

# TECHNICAL UPDATE

MAY 2<sup>ND</sup> 2019

## SOFTWARE VERSION 2.8 - NEW RELEASE

The new Zipwake Series S Software Version 2.8 incorporates the following improvements together with some smaller enhancements.

1. Communication protocol adjusted to ensure fail-safe operation in case of e.g. damaged cable. The software remains backward compatible between software versions.
2. Solves issue when adjusting Auto Roll lower/upper limit with speed displayed in mph.
3. New demo feature where continuous full interceptor strokes is activated/deactivated by double-clicking the speed knob.

## SYSTEM UPGRADE

Download the software upgrade file from [www.zipwake.com](http://www.zipwake.com) and copy it to the root of a high quality USB memory stick. Then refer to the Operator's Manual Section 17 and follow the remaining steps, or follow the link: <https://youtu.be/UPm5woBwa3Y>
