

TECHNICAL UPDATE SERIES S

APRIL 22TH 2020

SOFTWARE VERSION 2.10 -NEW RELEASE

- Function added to pitch offset control (auto pitch on) to freeze at zero offset when adjusting the pitch offset. The function allows for easy reset of an applied pitch offset. The freeze function is enabled for 1 sec.
- Function added to manual roll control to freeze at equal port/starboard position when adjusting roll manually. The function simplifies manual adjustment to neutral roll control. If the roll wheel is turned fast, the freeze function does not activate. The freeze function is enabled for 1 sec.
- SU serial number is now shown on Interceptor Check result pages.
- Correction file numbering increment when exporting pitch curve and system config to USB memory stick.

SYSTEM UPGRADE

Download the software upgrade file from www.zipwake.com and copy it to the root of a high quality USB memory stick. Then refer to the Operator's Manual Section 17 and follow the remaining steps, or follow the link: <https://youtu.be/UPm5woBwa3Y>
