

GET A NEW INSIGHT

JUNE 18TH 2021

TECHNICAL INSIGHT

Series S and Series E

New release - Version 3.2

New features

- Interceptor Check included as a new step during Initial Start (Series S).
- Adjusted Auto Roll when entering/exiting turns.
- Menu selection to reset the saved Interceptor configuration (Series E).
- Allows adding +/-20% Pitch Offset when blade is already fully deployed and retracted, respectively.
- The first Auto-Cleaning cycle after a change of the cleaning interval setting starts 30 seconds after system turn off. During this cleaning, the Control Panel is also turned on. Subsequent Auto-Cleaning starts after the set interval time and the Control Panel remains off.
- Extended timeout for getting GPS fix to execute Auto-Cleaning (5 minutes).
- Improved accuracy of motor temperature measurement.
- Improved tolerance towards momentary high load on interceptors.

SYSTEM UPGRADE

Download the software upgrade file from www.zipwake.com and copy it to the root of a USB memory stick. Note there are separate files for Series S and Series E and only one should be present on the root of a USB memory. Refer to the Operator's Manual Section 17 and follow the steps to upgrade the Zipwake system.

A video of the upgrade procedure is found here: <https://youtu.be/UPm5woBwa3Y>

A Dynamic Trim Control System like no other.
